

Israel's High-Powered Laser System A 'Breakthrough'

by Hugh Fitzgerald

Israel has once again reminded us that we should thank our lucky stars that the Jewish state is on our side. In the “What Have You Done For Us Lately” Department, Israel has just completed tests of its new high-power laser system that, installed on a civilian aircraft, can shoot down drones. It promises to be what is called a game-changer. The story of this remarkable advance is here: “Israel successfully downs targets using airborne laser system,” by Anna Ahronheim, [Jihad Watch](#).
