

# Multiple IEDs found in package at New Jersey train station

[injured 29 people](#) and the explosion from a garbage can near a charity run in New Jersey. In the [other New Jersey incident](#), investigators discovered three pipe-bomb-type devices wired together, but no one was wounded.

Bomb technicians from the FBI, the county and the New Jersey State Police arrived on scene in Elizabeth and a robot was sent to examine the devices.

“In the course of rendering one of the devices safe, it detonated. There are no injuries & law enforcement personnel are at the scene processing evidence,” according to a tweet from FBI Newark account.

The device was detonated in a controlled setting, Bollwage said. The sound of the explosion reverberated loudly as heard on
