

Muslim pupils tell Hindu classmates to convert to Islam to avoid bullying

From the [*Telegraph*](#)

Muslim pupils are telling their Hindu classmates to change their religion to avoid bullying and make their lives easier, a think tank has found.

The [*study by the Henry Jackson Society*](#) found that Hindu pupils are being “held responsible” for the actions of India and facing xenophobic slurs from white pupils – *(got to get the balance in – lest one be ‘cancelled’. Just remember, Batley Grammar, Kettlethorpe High in Wakefield and Astor School in Dover)*

It comes after disorder broke out in Leicester between the Hindu and Muslim communities, which the report warned the same tensions are fuelling discrimination in schools. Half of Hindu parents said their children had suffered hatred in schools with incidents including a pupil having beef thrown at her by classmates,

Police in Leicester made 55 arrests last September after weeks of disorder which included vandalism of property, assaults, stabbings and [*attacks on places of worship*](#). The think tank previously found that the tensions were linked to conflict between young people from Muslim and Hindu communities and false narratives claiming there was Hindu extremism in Leicester.

“There were numerous instances of derogatory references made towards Hindus, such as mocking their vegetarianism and belittling their deities, which were also made by Islamist extremists rallying against the Hindu community in Leicester.”

The reports said Hindu pupils were being “held responsible for politics and social issues in India reminiscent of the treatment of Jews with regard to Israel

It found that Muslim pupils called for Hindus to convert or face “threats of hell for disbelievers” using terms such as “kaffir”.

In one example a child “was harassed and told that if they convert to Islam, their life will become so much easier” and in another told: “You aren’t going to survive very long... If you want to go to paradise, you’ll have to come to Islam... Hindus are the herbivores at the bottom of the food chain, we will eat you up.”

Another parent said children were told to watch videos of an Islamic preacher and to “convert because Hinduism makes no sense”. *And for balance a Christian child telling of the superiority of Jesus.*

My favourite comment which sums up my view

- Notice also how bullying by Muslim kids is called harassment, whereas a single comment by a Christian kid is called xenophobia by the journalist. This is a Christian country, the only holidays from school should be those okayed by the government, the list for which is based around our culture. Seems like schools are letting some faiths have extra hols, then penalising other parents who take kids out of school for, e.g. cheaper flights.
- I doubt it was said by any white child and the report is deflecting the accusations of 100% from Muslims by ‘including’ a misdemeanour by a white child.
- I suppose Muslim Children will then turn on Christian Children and tell them to convert. No doubt the authorities and the police will look the other way. *This is already happening [in our prisons.](#)*
