

No, President Trump did not suggest injecting bleach

The press is willfully ignorant, biased and dishonest. I watched the news conference. They were talking about how sunlight and heat/humidity kills the virus. He suggested light and heat as therapy. And yes, there is a therapy being worked on. They have tiny catheters with light which can be inserted into the airways. See below:

Dr. Birx must not have known about it or was confused about the question. That's all. They will probably have to clarify this today like they have to spend time most days clarifying some other ridiculous news report.

More [why the video was removed from YouTube](#):

New York Times reporter Davey Alba posted several tweets Friday night about his efforts to get YouTube to take down videos about the COVID-19 Chinese coronavirus regarding President Trump recent comments about experimental treatments for the virus and a company, Aytu BioScience, that is claiming a UV light treatment can kill the coronavirus inside patients' bodies via a fiber optic catheter inserted in an intubation tube. The company [issued a press release on Tuesday](#) about the treatment, two days before Trump was mocked by the media for speculating about such treatment. The company says a peer-reviewed study is forthcoming.

YouTube took down the Aytu BioScience video Friday night soon after Alba reported the video to YouTube...
