

Qatar and this Trump proposition will leave Israel's Existential Enemies Alive To Fight Another Day...

By Gerald A. Honigman

Instead of exterminating the butchers of its innocents as the IDF has plans to do, this new proposition from Donald Trump leaves Hamas alive to fight another day, as Jared Kushner, whom I have thought well of, apparently is now also willing to sacrifice future Israeli security, given that Hamas has repeatedly pledged to repeat the wanton massacres of October 7th, 2023 over and over again.

Israel will get less than two dozen live innocent hostages back, and in return has to free hundreds of terrorists who should never have been taken alive in the first place.

After losing the equivalent of about 40,000 American 19-25 year old soldiers, Netanyahu and the IDF will be forced to accept yet another "hudna" ceasefire which will allow the Hamasniks to find a way to regroup and rearm. This loss is in addition to the equivalent of another 40,000 American civilians slaughtered on Simchat Torah, 10/7/23.

There is absolutely NO moral equivalency between innocent people DELIBERATELY targeted for murder and mutilation and those who die because their "heroes," whom they elected to power, commit atrocities and then return to embed and hide behind their women and children—a double war crime according to the Geneva Conventions on War.

After we fought our enemies in WWI and WWII, we demanded total surrender and victory. And after 9/11, we didn't ask sovereign

countries harboring al-Qaida for permission to violently pursue them in those countries.

Yet, now there's criticism of Israel for doing this exact same thing targeting Hamas in Qatar.

Why should Israel, repeatedly attacked by genocidal enemies on 7 fronts, have its collective arm twisted to accept anything less than the total victory which the Allies demanded of Nazi Germany and Imperial Japan.

Israel is 9-15 miles wide and requires a magnifying glass to locate on a world globe, and doesn't have two vast oceans separating it from its main enemies.

Here's [what needs to be done](#)—not a ceasefire which benefits Hamas only:

According to this latest news seen below, Jared Kushner, Trump's son-in-law, joins Witkoff to meet Netanyahu's chief adviser regarding Gaza. Unfortunately, this avid fisherman smells a rotten fish regarding this meeting...

If this wasn't bad enough, after Israel eradicated yet more Hamas leader masterminds of the October 7th 2023 butchery in the very room where they planned it (neat, eh?), and in which terror enabling Qatar was hosting and allowing to live in luxury, President Trump is evidently upset (enraged?) with Israel...

Note that this Israeli strike occurred one day after Hamas boarded a bus filled with Israeli civilians and shot six to death in the head at point blank range, wounding a dozen others as well.

Unbelievable.

If Israel was giving refuge to murderers of Americans, how would America react to this...especially if those people had the blood of thousands of Americans on their hands over the decades?

The time for Jews and the sole, minuscule, resurrected Jew of the Nations to stop being subjected to hypocritical double standards which no other nations are expected to adhere to has to come to an end.

The nation of Qatar (and other autocratic Arab oil potentates) has a long history of gifting American universities with billions of dollars in aid over the decades, and this definitely has come with a price tag which included, among other things, what was and what wasn't included on required reading lists and course curricula...and who got hired to teach those courses.

The next analysis is an absolute must read eye-opener regarding the pervasive nature of this influence...
