

# Schadenfreude – Supreme Leader Ayatollah Khamenei Rushed to Hospital in Critical Condition

Ayatollah Khamenei, Iran's Supreme Leader

Schaden Freude Alert! This is NOT Purim Shpiel. Supreme Ruler Ayatollah Khamenei rushed to hospital in critical condition. This may be evidence that sometimes Ha Shem does work in less than mysterious ways. The report of Ayatollah Khamenei's 'critical condition' gives heft to the magnificent address by Israeli PM Benjamin Netanyahu's address before a joint meeting of Congress. If confirmed it should bolster support for the real deal that Bibi spoke of- regime change in Tehran. That message should not be lost on President Obama, Secretary Kerry and the rest of the P5+1 intent on cutting a deal with this malevolent apocalyptic Mahdist regime fomenting chaos to awaken the moribund Twelfth Imam in the holy well in the holy city of Qom, Iran. We trust that my cioreligionists last night shook that grogger (Purim noisemaker) (during the reading of Esther's Megillah, but substituted Khamenei for Haman. Chag Purim Sameach. Note this *Israel National News* report on this 'revoltin' development, [Report: Iran's Supreme Leader Hospitalized in Critical Condition](#):

Just in time for Purim, the Jewish holiday celebrating the redemption of the Jewish people from plots of genocide in ancient Persia, Iranian Supreme Leader Ayatollah Ali

Khamenei was reportedly hospitalized in critical condition on Wednesday.

According to Arab media reports cited by *Israel Hayom*, Khamenei was urgently brought to a hospital in Tehran after several of his bodily systems had already failed.

The reports add that the 76-year-old supreme leader of the Islamic regime has undergone surgery and remains in critical condition.

Recently it has been reported that he was suffering from prostate cancer which had spread to additional parts of his body, and due to his poor health condition he had largely ceased taking part in public events.

The hospitalization comes just days after Prime Minister Binyamin Netanyahu addressed Congress on Tuesday to warn of the existential threat to Israel and the world that Iran poses, urging America to avoid the deal being formed on Iran's nuclear deal ahead of a March 31 deadline for talks.

Lending some credence to the reports is the fact that Khamenei's official Twitter account hasn't been updated since Netanyahu's speech on Tuesday, when he wrote the "US is now facing a #dilemma. It should either stop unlimited services to #Israel or they'll lose more face in the world."
