The Boeing CHAMP Missile-A Non Nuclear EMP — Does Israel have its Version under Development?

Boeing CHAMP non nuclear EMP cruise missile

We noticed that the Boeing CHAMP non-nuclear EMP missile is back in the news after first surfacing following US Air Force (USAF) Research tests in Wendover, Utah in October, 2012. CHAMP stands for Counter-electronics High Power Microwave Advanced Missile. Yesterday, Digital Journal reported CHAMP's official announcement by the USAF, "Boeing debuts powerful electromagnetic pulse weapon":

The main development of CHAMP comes from Boeing, and it appears the project has been underway
