

The Gruesome Reality of Hamas and Hizbullah, Iran, & the Difference a Truly Great American President made After World War II

By Gerald A. Honigman

The following analysis and carefully selected links cover the gruesome reality Israel faces with Hamas & Islamic Jihad in Gaza (& “ordinary” Arabs who gleefully joined in the bloodlust of October 7th, '23), & their counterparts in Lebanon, whose country has been hijacked by Hizbullah...

In Lebanon, Israel is simply expected to allow all of northern Israel to become virtually uninhabitable due to constant bombardment and terror, with most of its population having to flee their homes.

A home in the northern city of Kiryat Shmona is damaged following a Hezbollah rocket attack, April 1, 2026. (Fire and Rescue Service) From the Times of Israel

Lebanese civilians having to do likewise are victims of Hizbullah, not Israel...and Hizbullah is made up of many of those people.

There's no doubt that the destruction has been devastating. But when fighters routinely use apartment buildings, schools, hospitals, and other civilian facilities to launch rockets, missiles, and such, and dig tunnels under private homes leading into Israel to terrorize and slaughter Israelis from, these places lose their innocence.

Hizbullah, Hamas, Islamic Jihad, Fatah, al-Qaida, ISIS, other jihadi organizations, and Iran all have the obliteration of Israel and wanton butchery of Jews as their goal.

Regardless of this non-stop nightmare, the Trump team is now overly critical of Israel in contrast to our dismay that the just war against the genocidal, supremacist Iranian regime was not carried through to the total victory and unconditional

surrender he declared were his original aims, along with denuding Iran.

[Hamas' Gaza...](#)The opening first segment in this link is what's relevant. Just skip over the rest because there are some obvious inaccuracies being discussed...

[Open this next link](#) for further details and graphic photos on this topic.

Here's what [The Donald hinted he'd do](#), but has abandoned at the expense of 93 million Iranian peoples' lost chance to gain freedom and democracy in their land...

And, unfortunately, as stated above, Israel has been let down by President Trump and VP JD Vance. This is very troubling, indeed. See below...

And [this](#), and [this](#).

What's needed is for The Donald to actually walk the walk instead of just talking the talk.

Rather than persevering with a further "deal" which taqiyyah and kitman practicing mullahs and their associates have been using to stall for time, restock their ballistic missiles, enrich uranium, rebuild air defenses, solidify relations with China, North Korea, and Russia...and laugh at America as they do so, the presidential team must reconsider the actual long term benefits gained by completely defeating both the religio-political leadership and its military support system.

We did this with Nazi Germany and Imperial Japan after WWII, stayed the course, nurtured democratic principles and leadership...and wound up today with free and democratic German and Japanese friends and allies as a result.

In 1945: President Harry S. Truman, was at the helm; a truly great American leader.

Iran does have a regular army, the Artesh, not the terrorist IRGC and Basij, whose loyalties have historically been to the age old, proud nation of Iran, and its Shah (sometimes good, other times not), not to an Arabized theocracy imposed on it as a result of the jihadi Arab colonizing, settling, and forcing converting invasions of caliphal imperialist Arab hordes pouring out of a fast desiccating Arabian Peninsula from the 7th century C.E. onwards.

America needs to find and materially support these forces, and be there—as Israel has repeatedly been, in the recent past...
