

The Myth of the Primeval Matriarchy

by Emmet Scott (June 2016)

Origin myths are of tremendous psychological importance; in many respects they inform our attitude to the world, to life and to the future. That is why Darwinism, which may be regarded as the first materialist creation-myth, was of such fundamental importance. It would be no exaggeration to say that in many respects the twentieth century was a creation of Charles Darwin. Certainly the decline and even death of Christianity in Europe owes very much to his epoch-making *Origin of Species*. [more>>>](#)
