

These Are the Courageous Doctors Who Fought the Covid Farce and Paid the Price

by Armando Simón

“Cowardice asks the question, is it safe? Expediency asks the question, is it politic? Vanity asks the question, is it popular? But conscience asks the question, is it right? And there comes a time when one must take a position that is neither safe, nor politic, nor popular, but one must take it because it is right.” –Martin Luther King

Doesn't it strike anyone as being in the least bit odd that those health care workers (physicians, nurses, researchers) who have gone against the current – as voiced by the politicians, the network news and the CDC – regarding the morbidity of COVID and/or the treatment against the virus, have been subjected to a torrent of insults, to censorship,

and even loss of jobs and/or certification – simply for doing what health care workers have done throughout the centuries, that is, giving their professional opinions? Meantime, on seeing the internet mob go after their colleagues, other health care professionals have cowardly chosen to remain quiet and let the grotesque COVID farce play out.

Since when is punishment the reaction to a doctor giving a medical opinion?

Along the same lines, has no one noticed that both the analysis, the prognosis, and the treatment regarding the virus has been a total fiasco?

One cannot also help but be angry over the intense attacks at doctors and nurses who are carrying out their professional duty by disagreeing with the official dogma. What a contrast from the start of the epidemic in early 2020 when they were justly called heroes, when the lockdown citizens of Paris, Rome, Barcelona and elsewhere for weeks would go out at night on their balconies and applaud, and shout praise and songs of gratitude and admiration for their doctors and nurses in hospitals, many of whom were dying doing their duty!

Unless I am mistaken, I believe that this is the first time in history that so many doctors and nurses have been threatened, persecuted, censored and tormented for doing their job, or for rendering a professional judgment. This contemptible behavior has been by leftist hysterics, by journalists, by latte-sipping cocaine-snorting celebrities and, incredibly, even by some of their peers. Throughout, these Covidian tormentors and slanderers – most of whom could not tell you the difference between apoptosis and dendrites, but posturing as if they had medical knowledge have been screaming – literally screaming – against “disinformation” and “misinformation” being voiced by dissenters being circulated in today’s samizdat, the internet. Throughout, they have painted the dissidents as “ignorant,” “dangerous,” “reckless,” “fascists,” “racists,” rarely stating

that the dissenters were health care professionals. They deliberately gave the impression that the unnamed dissenters were a bunch of uneducated yahoos while they were intellectually and morally superior. (In reality, it appears that the group of people most likely to be hesitant in getting a vaccine is one with Ph.Ds.).

And, throughout the pandemic of propaganda, the ones who have been shouting, "Follow the Science!" loudest in the past few years like NPCs are the most anti-scientific cohort. One cannot help but be angry again over the misrepresentation of science by these buffoons. Even Aaron Rodgers, a football player, knows this when he said, "If science can't be questioned it's not science anymore, it's propaganda, and that's the truth." No true scientist has ever said that "the science is settled," or "don't question the science" on any topic. Not since the Creationists' antics has anyone dragged the name of science through the mud.

The irony is that it is the dissenters, whether they be the nurses, the doctors, the researchers and even some of the laymen, are the ones who have been doing the real science.

Early in the beginning of the panic pandemic, I wrote that the overreaction to the disease simply did not make sense. Something didn't add up. Here, I digress momentarily: in scientific experiments, studies and trials, it is a standard procedure to have a representative sample of the population at large to determine the effect/prevalence of x. Obviously, a pathogen cannot be given to healthy people. However, in early 2020 the passengers and crew in a cruise ship in Asia contracted the Wuhan virus and they were not allowed to disembark anywhere. I said representative, but the passengers were not representative of the population in so far as they were mostly geriatrics. So, the cruise ship should have been a floating coffin. Yet, out of out of 3,711 passengers, only seven died (301 infected had symptoms, 318 had no symptoms).

By early summer 2020, it was patently obvious to any rational person that there had been an overreaction and many were openly questioning the logic of the measures being taken, particularly the drastic “temporary” lockdowns “to flatten the curve,” which were modeled after the authoritarian Chinese government’s reaction. Nonetheless, the panic was being fanned by the politicians and the media hivemind, embraced by the gullible, some of whom proclaimed it as the Black Death. Since then, the dissidents have steadily increased over time – as has the scorn and attacks leveled on them.

Note: the Pfizer and Moderna injections are not vaccines. Vaccines introduce an inert pathogen into the body in order to create antibodies. What passes for “vaccines” are gene therapy. But for the sake of a flowing narrative, they will be referred to as “vaccines” in this article.

Far from being yahoos, the physicians have been deliberately ignored, or conversely demonized, by the propaganda outlets and censored in various social media. It is important to emphasize all of these physicians made their declarations based on their firsthand clinical experience or published medical research. I will now cite them and their statements on covid, masks, lockdowns, morbidity, and vaccines, one by one, precisely because they have been censored, and because of the repercussions they have endured.

Throughout, keep in mind that the survival rate for covid is 99.95%, regardless of the impression that the media gives.

Early, in the beginning of the epidemic, Prof. Hendrik Streeck, director of the Institute of Virology at the University Hospital in Germany, said COVID-19 did not spread as easily as people were told.

Dr. Steven LaTulippe’s license was revoked by the Oregon Medical Board over his refusal to wear a face mask.

Dr. Ramin Oskoui: “Herd Immunity is how all pandemics end.

Whether it's induced by the use of vaccine or not. Under the age of 60 this virus acts as a prototype of the coronavirus vaccine. It makes you a little bit ill and you move on." And: "The reality is never in human history have we locked down a whole society. You quarantine the sick. You quarantine the vulnerable. You don't shut down the whole country. What he [Fauci] is suggesting is scientifically antithetical and unsubstantiated. I'm shocked that this man has any sort of podium anymore. He's been wrong so many times."

Drs. William Briggs and Jay Richard: "We're dealing with a fairly unremarkable coronavirus or infectious agent. It's real. It kills people. We're not denying that, but it's fairly unremarkable, historically." In their book, "The Price of Panic," they reveal that a teenage girl came up with the 6-foot social distance idea, adopted – against the advice of an epidemiologist. (Scott Gottlieb, the former commissioner of the FDA, admitted the social distance idea was "arbitrary in and of itself," noting that "nobody knows where it came from." It would be more interesting to learn how it became automatically accepted.)

Several doctors attended the "White Coat Summit" in Washington, D.C., to dispel the misinformation and myths surrounding the coronavirus. For attending this meeting, and for advocating the use of the drug hydroxychloroquine as a cure, Dr. Simone Gold was fired from her position after 20 years as an emergency room physician in two hospitals. Squarespace, which had originally posted the summit, censored it. One year later, another White Coat Summit was held (it was noted that, incredibly, no autopsies had been performed). When you view the summit, notice the calm deliberation of the message, which contrasts with the usual hysterical reporting in the propagandistic television networks and radio that are still going. Later, Dr. Gold was visited by a SWAT team with weapons drawn, who broke down her door.

Dr. Dan Erickson and Dr. Artin Massihi held a local press

conference in California to discuss some of the anomalies that they had witnessed and experienced regarding the disease and the government's reaction to it. "Something else is going on," they said, which has nothing to do with COVID. Their calm presentation of the facts and their skepticism of the official dogma and measures taken was a welcomed one, but some of the journalists' tone of voice were hostile. At any rate, the video was uploaded to YouTube and there was an immediate frantic censoring of it, whereupon someone else would upload it again. This went on several times and it resembled the arcade game of Whack-A-Mole. The video went viral, anyway, ultimately finding a safe place elsewhere. Many months later, the original video was allowed to resurface in YouTube. The Washington Post attacked their reasoning and facts and upheld the official dogma.

In May 2020, more than 500 doctors urged the president to end the lockdowns. Here it is in 2022 and various cities, states and countries are still enforcing lockdowns. Australia, in particular, has become a gigantic prison. The doctors, the science, have been ignored by the political authoritarians and their propaganda outlets.

Dr. Marc Siegel stated, "We're going to end up seeing a lot more people die from the after effects from this virus than from the virus itself if we don't end the lockdowns now."

Dr. Mike deBoisblank at John Muir Medical Center called for an end to the lockdowns. In one month, he saw a year's number of suicides as a result of the lockdowns.

"My name is Dr. Jeff Barke and I'm here representing thousands of physicians across the country whose voices are being silenced because we don't agree with the mainstream media and the experts who are telling us what to do. Never in the history of this great republic have we quarantined the healthy. Never in the history of this great republic did we tell churchgoers that it's illegal for you to exercise your

First Amendment right of freedom of religion, yet at the same time it's essential to keep pot dispensaries open."

Dr. Scott Atlas has been one of the most outspoken, fearless, dissidents. He would often agree to be interviewed on Fox News simply because all of the other networks and newspapers actively turned their backs on him, and Twitter and YouTube censored him. Atlas criticized lockdowns and reported that two thirds of COVID-related deaths had six co-morbidities, and hospitalized children may have had COVID, but were not hospitalized because of COVID. He pointed out that there was no scientific basis for closing schools, "It's inexplicable to not open the schools," said Atlas. "It's completely contrary to the data to keep the schools closed, it's counter to science, it's almost on the border of absurd to require a limit in the schools."

Atlas also brought up something that others have pointed out, namely that science had become politicized: "The United States is bizarrely denying the science," adding that the country is "denying fact and this shows really an indictment of the public health leadership of this country." Vaccinating children for COVID is immoral. He has further stated that he was surprised that Fauci was not fired for incompetence. His book is very revealing.

In Europe, 640 doctors joined to produce a video putting forth the proposition that the COVID pandemic is a deliberate global scam. YouTube promptly censored the video out of existence.

From early on, Dr. Brian C. Joondeph repeatedly lambasted the media for its panic mongering through the deliberate falsifying medical facts. In other words, for spreading misinformation while bemoaning misinformation (i.e., anything that contradicts the official dogma).

Dr. Harald Walach and colleagues published a research paper in the prestigious JAMA, wherein they concluded that prolonged

use of masks by children was harmful rather than beneficial. JAMA's Dr. Dimitri Christakis and Dr. Phil Fontanarosa subsequently removed the research paper. (But why not do a replication?)

Dr. Sunetra Gupta: "From the Sunday Times to The Guardian, senior MPs to Owen Jones, commentators have been lining up for months to pour scorn on my analysis."

Nobel Prize-winning Michael Levitt was scheduled to be the keynote speaker at the International BioDesign Research Conference. He was uninvited for having signed The Great Barrington Declaration and speaking out against the lockdowns. In true Orwellian fashion, his name disappeared from the program. And speaking of The Great Barrington Declaration, more than 916,000 scientists and physicians have signed it (all of them ignorant, uneducated, irresponsible fools, according to the propaganda outlets and the authoritarian politicians). And if you have not heard of The Great Barrington Declaration, ask yourself ... why not?

Yale epidemiologist Dr. Harvey Risch has stated, "Overall, I'd say that we've had a pandemic of fear. And fear has affected almost everybody, whereas the infection has affected relatively few. By and large, it's been a very selected pandemic, and predictable. It was very distinguished between young versus old, healthy versus chronic disease people. So, we quickly learned who was at risk for the pandemic and who wasn't. However, the fear was manufactured for everybody."

Florida's Surgeon General Dr. Joseph Ladapo stated, "I want you guys to step back for a moment from what you hear, sort of constantly, on TV, and just very briefly in terms of the data that supports mask use in kids and mandates for masks in kids, it is very weak, and that's a fact. The data do not support any clinical benefit for children in schools with mask mandates. The highest-quality data find no evidence of benefit."

Dr. Scott C. Miller's license was suspended by the Washington Medical Commission for prescribing ivermectin to patients. Taken early in the onset of the disease, it minimizes the symptoms' severity.

Dr. Jay Bhattacharya a professor at the Stanford University School of Medicine: "That's what this is, right? This is FUBAR." His defiance of the COVID hysteria has resulted in being smeared at Stanford University by the fanatics that infest every university in North America.

Dr. Rand Paul, a U.S. senator and critic of the alternating advice from Dr. Fauci (who has not treated a single patient) posted a video in YouTube. "Saying cloth masks work, when they don't, actually risks lives, as someone may choose to care for a loved one with COVID while only wearing a cloth mask. This is not only bad advice but also potentially deadly misinformation. Most of the masks you get over the counter don't work. They don't prevent infection." Sen. Paul's video was censored by the ideological-driven YouTube, not the only person to have it happen to him. He considered the censoring "a badge of honor." Others have been censored by YouTube.

Another doctor who has been censored for contradicting the Covidians' dogma is Robert Malone, this time by the equally ideological-driven Twitter. "We all knew it would happen eventually." It was followed up by YouTube censorship. He has been one of several persons who have pointed out that forcing people to undergo the defective vaccines violate the Nuremberg Code and who has stated that natural immunity is better than the vaccines. "Think twice before you vaccinate your kids. Because if something bad happens, you can't go back and say, 'whoops, I want a do-over,'" stating that the vaccine can cause permanent damage. He has called the irrational atmosphere over COVID, vaccines, masks, conformity "Mass Formation Psychosis." Sen. Elizabeth Warren – famous for shamelessly claiming to be a Native American in order to obtain the benefits that come with the label – asked Amazon to

remove (i.e., censor) Malone's book from inventory so people would not be exposed to it. So I bought a copy.

Dr. Scott Jensen, a family physician, received a notification from the Minnesota Board of Medical Practice. For the fifth time in a year and a half he was investigated for retaliation in proscribing ivermectin to COVID patients and for committing heresy by making statements that contradict the official dogma. Much worse, Jensen had submitted an affidavit requesting a temporary restraining order before the vaccines were given to adolescents.

Dr. Meryl Nass, a Maine doctor of 41 years, had her medical license suspended the Board of Licensure in Medicine for "spreading COVID misinformation" and treating COVID patients with ivermectin and hydroxychloroquine. "There is no legal mechanism by which they can strip certification," for "spreading misinformation," Nass said. In true Soviet fashion, she was ordered to undergo psychiatric examination for her heresy.

The Maine Board of Osteopathic Licensure decided to suspend the license of Dr. Paul Gosselin for "spreading misinformation regarding COVID-19."

Dr. Angelique Coetzee: "And let me be clear: nothing I have seen about this new [Omicron] variant warrants the extreme action the UK government has taken in response to it. No one here in South Africa is known to have been hospitalized with the Omicron variant, nor is anyone here believed to have fallen seriously ill with it. Yet Britain and other European nations have reacted with heavy travel restrictions on flights from across southern Africa, as well as imposing tighter rules at home on mask-wearing, fines and extended quarantines."

Dr. Alina Chan, a postdoctoral researcher at MIT and Harvard University, was called "a race traitor" and accused of racism for investigating the possibility of COVID-19 leaking from a

Wuhan, China, lab. "We could possibly have a future where only lab outbreaks in white-people countries can be investigated, whereas anything that comes from parts of Asia or Africa or South America cannot be investigated because it would be racist or anti-scientific," Chan said. "That's crazy."

Physician assistant at United Memorial Medical Center in New York, Deborah Conrad, stated that when she saw a flood of COVID-19 vaccine side effects in the emergency room, she was ordered not to report them to VAERS, the U.S. government's official Vaccine Adverse Event Reporting System.

Dr. Aaron Kheriaty, Medical Ethics Program at UCI Health, was fired from the University of California Irvine School of Medicine for being ethical in arguing that natural immunity puts people in a similar, or better, health than a vaccine against COVID-19, and, for refusing to be vaccinated. "Once I challenged one of their policies, I immediately became a 'threat to the health and safety of the community.' No amount of empirical evidence about natural immunity or vaccine safety and efficacy mattered at all. The university's leadership was not interested in scientific debate or ethical deliberation. In an effort to pressure me to resign, they wanted to restrict my ability to earn an income not only at the university but outside the university as well. It was dizzying and at times surreal." In social media, Kheriaty further observed that, "Those consumed by fear cannot tolerate those who are not afraid." He later went on to describe the near-totalitarian state of medicine in California when it comes to COVID.

Dr. Clive Dix, former chairman of UK's Vaccines Taskforce: "The Omicron variant is a relatively mild virus. And to just keep vaccinating people and thinking of doing it again to protect the population is, in my view, now a waste of time."

Dr. Roger Hodkinson: "The bottom line is simply this: There is utterly unfounded public hysteria driven by the media and politicians. It's outrageous. This is the greatest hoax ever

perpetrated on an unsuspecting public. This is not Ebola. It's not SARS. It's politics playing medicine and that's a very dangerous game. Masks are utterly useless. There is no evidence base for their effectiveness whatsoever. Paper masks and fabric masks are simply virtue-signaling."

Dr. Mary Bowden had her privileges revoked by Houston Methodist hospital and suspended for thoughtcrime, that is, "spreading dangerous misinformation," namely, her support of ivermectin and opposition to vaccine mandates. She is suing the hospital.

French doctors burned their medical diplomas in protest over being suspended without pay for refusing to take the vaccine. There was even less media coverage than usual.

Dr. Martin Kulldorff: "But Sweden decided to keep daycare and schools open for all children ages 1 to 15. And there are 1.8 million such children who got through the first wave without vaccines, of course, without masks, without any sort of distancing in schools. If a child was sick, they were told to stay home. But that was basically it. And you know how many of those 1.8 million children died from COVID? Zero. Only a few hospitalizations. So, this is not a risky disease for children."

Baylor University Medical Center fired Dr. Peter McCullough. Texas A&M College of Medicine and Texas Christian University and the University of North Texas Health Science Center School of Medicine cut ties with him for his comments about the experimental vaccines, and, for using hydroxychloroquine and ivermectin in the early treatment of COVID. "I've been stripped of every title that I've ever had in that institution. I've received a threat letter from the American College of Physicians, [and] a threat letter from the American Board." He opposes vaccinating healthy children and has bewailed the fact that pre-hospitalization cures have been bypassed in favor of vaccines. Recently, McCullough has

pointed out that since the vaccines have demonstrably failed to spread the Wuhan virus, the mandates should end. Dr. Anuj Malik at Ascension St. John referred to Dr. McCullough's statements as "politically motivated, ideological speech by a modern-day quack."

Dr. Martin Makary wrote, "But given the case-report level rarity of a healthy child dying of COVID-19, I would not recommend a two-dose vaccine regimen for a healthy child ages 0 to 12 years until we have more data."

Dr. Motherico Fedes: "There is a world war going on, only no one realizes it is one because it is being carried out under the guise of righteousness and science. Never before has the term science been misused and tarnished on such a global scale."

Dr. Adam Aneevit: "So if you still need a booster after been fully vaccinated, and testing after been fully vaccinated, and hospitalization after being fully vaccinated, and masks, social distancing and lockdowns all after been fully vaccinated? Then it's time that you've been FULLY conned."

Dr. Blaise Edwards: "Those physicians who are authoritatively forcing the shot on all patients have blood on their hands. They should know better, especially regarding pregnant women and children. Regarding the pediatric population, there is basically zero chance an otherwise healthy child could die of COVID, so why are we exposing the entire pediatric population to a potentially life-threatening jab? It is outrageous for a physician to recommend these jabs to otherwise healthy children."

In Austria, Dr. Andreas Sönnichsen penned a letter signed by 200 doctors against the vaccine. "The blanket declaration by the Austrian medical association, by politicians and the media that the vaccine is 'safe,' has proven to be unscientific propaganda." He further stated that "98% of people who

contract severe forms of COVID-19 show at least one relevant pre-existing condition.” In retaliation for stating scientific facts, he was fired from the Department of General and Family Medicine at the Center for Public Health in Vienna. Andreas Huss, chairman of the ÖKG, Austria’s public health insurance fund threatened him with prison. Dr. Thomas Szekeres, president of the Austrian Medical Association, also threatened the signatories. Sönnichsen responded, assuring him that they “will not be intimidated by you or any other health official with a similar mindset.”

In Austria, Dr. Johann Misliwetz: “Physicians who contradict the mainstream opinion face fines of up to 36,340 euros, the destructive ban on practicing medicine, and on top of that their deletion from the doctors’ registry.”

Dr. Cameron Kyle-Slidell, in April 2020, went to social media to express his concerns that intubation was doing more harm to patients and made no sense in treating the virus’ symptoms. Here it is 2022, and intubation is still being employed in hospitals with fatal results.

Dr. Eric Saunders was fired from Valley Hospital in Ridgewood, New Jersey, for refusing to take the dangerous vaccine. Nicole Fanelli a mammography technologist was fired from Crozer Health in Pennsylvania for the same reason. The same with Nicole Thibodeau, a registered nurse case manager for Beth Israel Lahey Health. Also, Trudiann Edmondson, a remote patient care coordinator, from Northwell Health. Loni Thalheimer, a nurse, was also fired for refusal to submit. She stated, “About two, three months into the community having full access to vaccines, I started seeing A LOT of people coming in for MRIs for idiopathic seizures, migraines, dyskinesias, paresthesias, and even comas. I stated we are seeing a rise in weird, abnormal things happening in healthy people, and everyone refused to answer me. If we are in a clinical trial, why are we not required to be collecting data? I was baffled.”

Maryland Rep. Dr. Rep. Andy Harris is having his license investigated because he prescribed ivermectin to patients instead of ramming a tube down their lungs (India ended the COVID pandemic as early as the start of summer 2021 through the use of ivermectin).

In Quebec, over 100 doctors, nurses and other health care individuals held a protest against the insane "vaccine passport." Elsewhere in Canada, Dr. Daniel Nagase used his medical judgment to prescribe ivermectin to three patients who were at death's door. They got better. Then, the staff took away the lifesaving medication and Nagase was fired. "There is something malicious going on. I hope you can all see the bigger picture. This is more than me having all my assignments to take care of small communities cancelled for the rest of the year. This is more than the medical director, Dr. Francois Belanger, banning me from hospital practice throughout all of Alberta."

An undercover operation recorded persons working in a pharmaceutical company saying that children do not need vaccines and should not get it. As usual, this was ignored by the propaganda outlets. John Soriano was an executive at a pharmaceutical company who resigned in protest for coercing its employees to take the vaccine (he did so willingly), thereby forfeiting millions of dollars, "because I cannot support such an immoral, anti-science show of force." His narrative is well worth a read.

An unidentified doctor made a video of experiments demonstrating that face masks are useless in preventing the transmission of a virus.

Dr. Ted Noel writes, "The CDC and FDA are totally invested in expensive vaccines that cause myocarditis, strokes, miscarriages, and other major complications" whereas "Ivermectin, [is] an incredibly inexpensive drug with very little toxicity." One cannot help but wonder why, indeed, is

there a dogmatic refusal to consider ivermectin and/or hydroxychloroquine if they have been found to save people's lives and have no side effects, nothing near like the untested gene therapy "vaccines." And why is the media desperately being silent on this?

Novant Health, a North Carolina-based hospital system fired 175 health care workers for their refusal to take the dangerous vaccine. Indiana University Health fired 125 staff members for the same reason. So many health care workers refuse to engage in Russian roulette with their health that CDC Director Dr. Rochelle Walensky said the National Guard may have to fill in.

Dr. John P.A. Ioannidis looked at 14 countries' records for fatality due to COVID. People up to the age of 19, have 0.0027% chance to die from COVID-19, people between the age of 20-29 have 0.014% change to die, those between 60-69 with a risk of 0.59% to die. He has warned of this "once-in-a-century evidence fiasco." By going against the official dogma, Dr. David Gorski bemoaned the fact that Ioannidis is no longer his hero.

Dr. Mollie James, an ICU Doctor in New York City: "Never in my lifetime have I seen medicine so politicized, where individual treatments are banned because of who is promoting them. It's a scary time to be a healthcare professional, and the public needs to know how bad things are getting. Your healthcare is being guided by political demands, not by what will lead to the best individual healthcare outcomes."

What is just as bad is that science is being sabotaged by suppressing data: "We are being pressured to vaccinate, and we see the large number of vaccine complications in our ICU's and ER's that are going unreported. Doctors are afraid to report all of these vaccine complications even though we are clearly seeing them. I would estimate 30% of the ICU patients in NYC are from vaccine complications but nobody wants to talk about

that. They get coded as something else or they will ignore the fact an otherwise healthy person had a heart attack or stroke within 48 hours of receiving the vaccine.”

There is a very good reason why it takes many years to produce a new vaccine or medicine. Can you say “thalidomide”?

Dr. Daniel Stock spoke at Mt. Vernon School Board Meeting and explained the nature of airborne pathogens such as covid; he recommended the use of hydroxychloroquine and ivermectin, and he damned the CDC and NIH as being anti-scientific. This energetic delivery was promptly censored by YouTube. Before it was taken down, the video went viral and consequently, a number of internet media outlets pounced and classified his statements as “disinformation.”

There have been a lot of asinine and immoral decisions made regarding the disease. Racism has been instituted in a number of cities when it comes to treatment of covid. Dr. Joel Zinberg, at the Icahn School of Medicine at Mount Sinai blasted New York City’s leftist bureaucrats’ decision to give preference to who are “Black, Indigenous, and People of Color” and relegate whites to the end of the line. “These directives are immoral, illegal and bear no relation to the science.”

Dr. Deborah Birx: “There is nothing from the CDC that I can trust.” The CDC has been inflating both mortality rates and number of cases by 25% or more.

Dr. Thomas T. Siler wrote what had been learned 18 months into the pandemic that journalists insisted would kill 2 to 11 million people in the United States alone: 1) Globally, the survival rate for COVID-19 is 99.8%. 2) Herd immunity for the alpha strain is here. 3) The average age of death from COVID is 78. 4) Early outpatient treatment should be adopted immediately for COVID-19. Hydroxychloroquine works. Ivermectin works. It has been estimated 85% of COVID-19 deaths could have been prevented were these medicines used early. 5) Children

are safe from COVID-19 and don't spread the virus either. 6) Sweden did not have a lockdown or mask mandate and did better with cases and deaths than many countries. 7) Persons who have had COVID-19 infection have a robust and long-lasting immunity. 8) There is very little, if any, spread of COVID-19 from asymptomatic persons. 9) The death rate nationally for COVID-19 has been going down since January 2021. "Breathless 'news' reporters talk about cases, hospital occupation, and contagiousness but never mention the death decline."

Dr. Jessica Rose and Peter McCullough analyzed VAERS data. She found that the yearly number of reported adverse effects had skyrocketed. There were over 11,000 heart attacks, 13,000 cases of Bell's palsy, over 25,000 cases of myocarditis or pericarditis and more than 21,000 deaths. They were vaccine related. The analysis was published in a scientific journal. And then it was promptly censored. Without explanation. The paper can be viewed in samizdat-internet.

When Dr. Charles Hoffe warned that the mRNA "vaccine" is very dangerous, which causes blood clots and myocarditis and may kill people, based on what he was witnessing in a hospital and private practice, he was issued a gag order against speaking out on behalf of his patients. By contrast, no one in the community died or became permanently disabled due to the COVID-19 virus. Hoffe did not, and was punished by being removed from the hospital. He is unrepentant, saying the loss of income is "the price of advocating for the safety of my patients."

The Association of American Physicians and Surgeons (AAPS) issued a statement in April 2021 that vaccines cause blood clots. Here it is February 2022 and the authorities are offering the vaccines and the media hivemind (New York Times, Washington Post, NPR, Boston Globe, The Guardian, San Antonio Express-News, ABC, NBC, CNN, MSNBC, CBC, CBS, BBC, and their subsidiaries, etc.) on a daily basis is urging everyone, including children, to get the experimental concoction and

demonizing anyone who refuses or objects. The media is truly the enemy of the people. On so many levels.

Dr. Bryam Bridle: “We thought the spike protein was a great target antigen, we never knew the spike protein itself was a toxin and was a pathogenic protein. So by vaccinating people we are inadvertently inoculating them with a toxin. Once in circulation, the spike protein can attach to specific ACE2 receptors that are on blood platelets and the cells that line blood vessels. When that happens it can do one of two things: it can either cause platelets to clump, and that can lead to clotting. That’s exactly why we’ve been seeing clotting disorders associated with vaccines. It can also lead to bleeding.”

Washington Medical Commission revoked Physician Assistant Scott Miller’s medical license. For one thing, he was advocating the use of ivermectin and the discarding of face masks.

Dr. John Witcher, at the Baptist Memorial Hospital in Yazoo City, was removed from treating patients for making a medical decision in taking them off Remdesivir, and allowing them to use ivermectin.

UK’s Dr. Andrew Bostom took a look at the statistics and concluded that the chances of a child under the age of 15 being struck by lightning are four times than of dying from the covid virus.

18 months into the pandemic panic, Dr. Vinay Prasad stated that children are much less vulnerable to the illness and that the forced wearing of face masks may cause harm to them, noting in passing, “the issue has been transformed into a right-left political battle.” The fanatical Covidians’ pretense of caring for children’s health rings hollow: Children are practically immune to covid – in spite of what the propaganda outlets scream out – and they know it. On the

other hand, kids have suffered because of masks and being away from schools. Proof of this is that our overlords discard their face masks once the cameras are out of sight.

Lastly, Israel's Dr. Yoram Lass: "It is the first epidemic in history which is accompanied by another epidemic – the virus of the social networks. These new media have brainwashed entire populations." And: "Mortality due to coronavirus is a fake number. Most people are not dying from coronavirus. Those recording deaths simply change the label. If patients died from leukemia, from metastatic cancer, from cardiovascular disease or from dementia, they put coronavirus."

Unfortunately, due to lack of space, I have left out other physicians, the numerous nurses, as well as regular people who may not have a medical degree but can think for themselves with impeccable logic (e.g., "If your shot works, why should I take one? If your shot doesn't work, why should I take one?" "Of course all scientists agree when you censor the ones who don't" "Imagine a vaccine so safe you have to be threatened to take it for a disease so deadly you have to be tested to know you have it!!").

When this farce finally ends, heads will roll.

"Cowardice asks the question, is it safe? Expediency asks the question, is it politic? Vanity asks the question, is it popular? But conscience asks the question, is it right? And there comes a time when one must take a position that is neither safe, nor politic, nor popular, but one must take it because it is right." –Martin Luther King

Doesn't it strike anyone as being in the least bit odd that those health care workers (physicians, nurses, researchers) who have gone against the current – as voiced by the politicians, the network news and the CDC – regarding the morbidity of COVID and/or the treatment against the virus, have been subjected to a torrent of insults, to censorship,

and even loss of jobs and/or certification – simply for doing what health care workers have done throughout the centuries, that is, giving their professional opinions? Meantime, on seeing the internet mob go after their colleagues, other health care professionals have cowardly chosen to remain quiet and let the grotesque COVID farce play out.

Since when is punishment the reaction to a doctor giving a medical opinion?

Along the same lines, has no one noticed that both the analysis, the prognosis, and the treatment regarding the virus has been a total fiasco?

One cannot also help but be angry over the intense attacks at doctors and nurses who are carrying out their professional duty by disagreeing with the official dogma. What a contrast from the start of the epidemic in early 2020 when they were justly called heroes, when the lockdown citizens of Paris, Rome, Barcelona and elsewhere for weeks would go out at night on their balconies and applaud, and shout praise and songs of gratitude and admiration for their doctors and nurses in hospitals, many of whom were dying doing their duty!

Unless I am mistaken, I believe that this is the first time in history that so many doctors and nurses have been threatened, persecuted, censored and tormented for doing their job, or for rendering a professional judgment. This contemptible behavior has been by leftist hysterics, by journalists, by latte-sipping cocaine-snorting celebrities and, incredibly, even by some of their peers. Throughout, these Covidian tormentors and slanderers – most of whom could not tell you the difference between apoptosis and dendrites, but posturing as if they had medical knowledge have been screaming – literally screaming – against “disinformation” and “misinformation” being voiced by dissenters being circulated in today’s samizdat, the internet. Throughout, they have painted the dissidents as “ignorant,” “dangerous,” “reckless,” “fascists,” “racists,” rarely stating

that the dissenters were health care professionals. They deliberately gave the impression that the unnamed dissenters were a bunch of uneducated yahoos while they were intellectually and morally superior. (In reality, it appears that the group of people most likely to be hesitant in getting a vaccine is one with Ph.Ds.).

And, throughout the pandemic of propaganda, the ones who have been shouting, "Follow the Science!" loudest in the past few years like NPCs are the most anti-scientific cohort. One cannot help but be angry again over the misrepresentation of science by these buffoons. Even Aaron Rodgers, a football player, knows this when he said, "If science can't be questioned it's not science anymore, it's propaganda, and that's the truth." No true scientist has ever said that "the science is settled," or "don't question the science" on any topic. Not since the Creationists' antics has anyone dragged the name of science through the mud.

The irony is that it is the dissenters, whether they be the nurses, the doctors, the researchers and even some of the laymen, are the ones who have been doing the real science.

Early in the beginning of the panic pandemic, I wrote that the overreaction to the disease simply did not make sense. Something didn't add up. Here, I digress momentarily: in scientific experiments, studies and trials, it is a standard procedure to have a representative sample of the population at large to determine the effect/prevalence of x. Obviously, a pathogen cannot be given to healthy people. However, in early 2020 the passengers and crew in a cruise ship in Asia contracted the Wuhan virus and they were not allowed to disembark anywhere. I said representative, but the passengers were not representative of the population in so far as they were mostly geriatrics. So, the cruise ship should have been a floating coffin. Yet, out of out of 3,711 passengers, only seven died (301 infected had symptoms, 318 had no symptoms).

By early summer 2020, it was patently obvious to any rational person that there had been an overreaction and many were openly questioning the logic of the measures being taken, particularly the drastic “temporary” lockdowns “to flatten the curve,” which were modeled after the authoritarian Chinese government’s reaction. Nonetheless, the panic was being fanned by the politicians and the media hivemind, embraced by the gullible, some of whom proclaimed it as the Black Death. Since then, the dissidents have steadily increased over time – as has the scorn and attacks leveled on them.

Note: the Pfizer and Moderna injections are not vaccines. Vaccines introduce an inert pathogen into the body in order to create antibodies. What passes for “vaccines” are gene therapy. But for the sake of a flowing narrative, they will be referred to as “vaccines” in this article.

Far from being yahoos, the physicians have been deliberately ignored, or conversely demonized, by the propaganda outlets and censored in various social media. It is important to emphasize all of these physicians made their declarations based on their firsthand clinical experience or published medical research. I will now cite them and their statements on covid, masks, lockdowns, morbidity, and vaccines, one by one, precisely because they have been censored, and because of the repercussions they have endured.

Throughout, keep in mind that the survival rate for covid is 99.95%, regardless of the impression that the media gives.

Early, in the beginning of the epidemic, Prof. Hendrik Streeck, director of the Institute of Virology at the University Hospital in Germany, said COVID-19 did not spread as easily as people were told.

Dr. Steven LaTulippe’s license was revoked by the Oregon Medical Board over his refusal to wear a face mask.

Dr. Ramin Oskoui: “Herd Immunity is how all pandemics end.

Whether it's induced by the use of vaccine or not. Under the age of 60 this virus acts as a prototype of the coronavirus vaccine. It makes you a little bit ill and you move on." And: "The reality is never in human history have we locked down a whole society. You quarantine the sick. You quarantine the vulnerable. You don't shut down the whole country. What he [Fauci] is suggesting is scientifically antithetical and unsubstantiated. I'm shocked that this man has any sort of podium anymore. He's been wrong so many times."

Drs. William Briggs and Jay Richard: "We're dealing with a fairly unremarkable coronavirus or infectious agent. It's real. It kills people. We're not denying that, but it's fairly unremarkable, historically." In their book, "The Price of Panic," they reveal that a teenage girl came up with the 6-foot social distance idea, adopted – against the advice of an epidemiologist. (Scott Gottlieb, the former commissioner of the FDA, admitted the social distance idea was "arbitrary in and of itself," noting that "nobody knows where it came from." It would be more interesting to learn how it became automatically accepted.)

Several doctors attended the "White Coat Summit" in Washington, D.C., to dispel the misinformation and myths surrounding the coronavirus. For attending this meeting, and for advocating the use of the drug hydroxychloroquine as a cure, Dr. Simone Gold was fired from her position after 20 years as an emergency room physician in two hospitals. Squarespace, which had originally posted the summit, censored it. One year later, another White Coat Summit was held (it was noted that, incredibly, no autopsies had been performed). When you view the summit, notice the calm deliberation of the message, which contrasts with the usual hysterical reporting in the propagandistic television networks and radio that are still going. Later, Dr. Gold was visited by a SWAT team with weapons drawn, who broke down her door.

Dr. Dan Erickson and Dr. Artin Massihi held a local press

conference in California to discuss some of the anomalies that they had witnessed and experienced regarding the disease and the government's reaction to it. "Something else is going on," they said, which has nothing to do with COVID. Their calm presentation of the facts and their skepticism of the official dogma and measures taken was a welcomed one, but some of the journalists' tone of voice were hostile. At any rate, the video was uploaded to YouTube and there was an immediate frantic censoring of it, whereupon someone else would upload it again. This went on several times and it resembled the arcade game of Whack-A-Mole. The video went viral, anyway, ultimately finding a safe place elsewhere. Many months later, the original video was allowed to resurface in YouTube. The Washington Post attacked their reasoning and facts and upheld the official dogma.

In May 2020, more than 500 doctors urged the president to end the lockdowns. Here it is in 2022 and various cities, states and countries are still enforcing lockdowns. Australia, in particular, has become a gigantic prison. The doctors, the science, have been ignored by the political authoritarians and their propaganda outlets.

Dr. Marc Siegel stated, "We're going to end up seeing a lot more people die from the after effects from this virus than from the virus itself if we don't end the lockdowns now."

Dr. Mike deBoisblank at John Muir Medical Center called for an end to the lockdowns. In one month, he saw a year's number of suicides as a result of the lockdowns.

"My name is Dr. Jeff Barke and I'm here representing thousands of physicians across the country whose voices are being silenced because we don't agree with the mainstream media and the experts who are telling us what to do. Never in the history of this great republic have we quarantined the healthy. Never in the history of this great republic did we tell churchgoers that it's illegal for you to exercise your

First Amendment right of freedom of religion, yet at the same time it's essential to keep pot dispensaries open."

Dr. Scott Atlas has been one of the most outspoken, fearless, dissidents. He would often agree to be interviewed on Fox News simply because all of the other networks and newspapers actively turned their backs on him, and Twitter and YouTube censored him. Atlas criticized lockdowns and reported that two thirds of COVID-related deaths had six co-morbidities, and hospitalized children may have had COVID, but were not hospitalized because of COVID. He pointed out that there was no scientific basis for closing schools, "It's inexplicable to not open the schools," said Atlas. "It's completely contrary to the data to keep the schools closed, it's counter to science, it's almost on the border of absurd to require a limit in the schools."

Atlas also brought up something that others have pointed out, namely that science had become politicized: "The United States is bizarrely denying the science," adding that the country is "denying fact and this shows really an indictment of the public health leadership of this country." Vaccinating children for COVID is immoral. He has further stated that he was surprised that Fauci was not fired for incompetence. His book is very revealing.

In Europe, 640 doctors joined to produce a video putting forth the proposition that the COVID pandemic is a deliberate global scam. YouTube promptly censored the video out of existence.

From early on, Dr. Brian C. Joondeph repeatedly lambasted the media for its panic mongering through the deliberate falsifying medical facts. In other words, for spreading misinformation while bemoaning misinformation (i.e., anything that contradicts the official dogma).

Dr. Harald Walach and colleagues published a research paper in the prestigious JAMA, wherein they concluded that prolonged

use of masks by children was harmful rather than beneficial. JAMA's Dr. Dimitri Christakis and Dr. Phil Fontanarosa subsequently removed the research paper. (But why not do a replication?)

Dr. Sunetra Gupta: "From the Sunday Times to The Guardian, senior MPs to Owen Jones, commentators have been lining up for months to pour scorn on my analysis."

Nobel Prize-winning Michael Levitt was scheduled to be the keynote speaker at the International BioDesign Research Conference. He was uninvited for having signed The Great Barrington Declaration and speaking out against the lockdowns. In true Orwellian fashion, his name disappeared from the program. And speaking of The Great Barrington Declaration, more than 916,000 scientists and physicians have signed it (all of them ignorant, uneducated, irresponsible fools, according to the propaganda outlets and the authoritarian politicians). And if you have not heard of The Great Barrington Declaration, ask yourself ... why not?

Yale epidemiologist Dr. Harvey Risch has stated, "Overall, I'd say that we've had a pandemic of fear. And fear has affected almost everybody, whereas the infection has affected relatively few. By and large, it's been a very selected pandemic, and predictable. It was very distinguished between young versus old, healthy versus chronic disease people. So, we quickly learned who was at risk for the pandemic and who wasn't. However, the fear was manufactured for everybody."

Florida's Surgeon General Dr. Joseph Ladapo stated, "I want you guys to step back for a moment from what you hear, sort of constantly, on TV, and just very briefly in terms of the data that supports mask use in kids and mandates for masks in kids, it is very weak, and that's a fact. The data do not support any clinical benefit for children in schools with mask mandates. The highest-quality data find no evidence of benefit."

Dr. Scott C. Miller's license was suspended by the Washington Medical Commission for prescribing ivermectin to patients. Taken early in the onset of the disease, it minimizes the symptoms' severity.

Dr. Jay Bhattacharya a professor at the Stanford University School of Medicine: "That's what this is, right? This is FUBAR." His defiance of the COVID hysteria has resulted in being smeared at Stanford University by the fanatics that infest every university in North America.

Dr. Rand Paul, a U.S. senator and critic of the alternating advice from Dr. Fauci (who has not treated a single patient) posted a video in YouTube. "Saying cloth masks work, when they don't, actually risks lives, as someone may choose to care for a loved one with COVID while only wearing a cloth mask. This is not only bad advice but also potentially deadly misinformation. Most of the masks you get over the counter don't work. They don't prevent infection." Sen. Paul's video was censored by the ideological-driven YouTube, not the only person to have it happen to him. He considered the censoring "a badge of honor." Others have been censored by YouTube.

Another doctor who has been censored for contradicting the Covidians' dogma is Robert Malone, this time by the equally ideological-driven Twitter. "We all knew it would happen eventually." It was followed up by YouTube censorship. He has been one of several persons who have pointed out that forcing people to undergo the defective vaccines violate the Nuremberg Code and who has stated that natural immunity is better than the vaccines. "Think twice before you vaccinate your kids. Because if something bad happens, you can't go back and say, 'whoops, I want a do-over,'" stating that the vaccine can cause permanent damage. He has called the irrational atmosphere over COVID, vaccines, masks, conformity "Mass Formation Psychosis." Sen. Elizabeth Warren – famous for shamelessly claiming to be a Native American in order to obtain the benefits that come with the label – asked Amazon to

remove (i.e., censor) Malone's book from inventory so people would not be exposed to it. So I bought a copy.

Dr. Scott Jensen, a family physician, received a notification from the Minnesota Board of Medical Practice. For the fifth time in a year and a half he was investigated for retaliation in proscribing ivermectin to COVID patients and for committing heresy by making statements that contradict the official dogma. Much worse, Jensen had submitted an affidavit requesting a temporary restraining order before the vaccines were given to adolescents.

Dr. Meryl Nass, a Maine doctor of 41 years, had her medical license suspended the Board of Licensure in Medicine for "spreading COVID misinformation" and treating COVID patients with ivermectin and hydroxychloroquine. "There is no legal mechanism by which they can strip certification," for "spreading misinformation," Nass said. In true Soviet fashion, she was ordered to undergo psychiatric examination for her heresy.

The Maine Board of Osteopathic Licensure decided to suspend the license of Dr. Paul Gosselin for "spreading misinformation regarding COVID-19."

Dr. Angelique Coetzee: "And let me be clear: nothing I have seen about this new [Omicron] variant warrants the extreme action the UK government has taken in response to it. No one here in South Africa is known to have been hospitalized with the Omicron variant, nor is anyone here believed to have fallen seriously ill with it. Yet Britain and other European nations have reacted with heavy travel restrictions on flights from across southern Africa, as well as imposing tighter rules at home on mask-wearing, fines and extended quarantines."

Dr. Alina Chan, a postdoctoral researcher at MIT and Harvard University, was called "a race traitor" and accused of racism for investigating the possibility of COVID-19 leaking from a

Wuhan, China, lab. "We could possibly have a future where only lab outbreaks in white-people countries can be investigated, whereas anything that comes from parts of Asia or Africa or South America cannot be investigated because it would be racist or anti-scientific," Chan said. "That's crazy."

Physician assistant at United Memorial Medical Center in New York, Deborah Conrad, stated that when she saw a flood of COVID-19 vaccine side effects in the emergency room, she was ordered not to report them to VAERS, the U.S. government's official Vaccine Adverse Event Reporting System.

Dr. Aaron Kheriaty, Medical Ethics Program at UCI Health, was fired from the University of California Irvine School of Medicine for being ethical in arguing that natural immunity puts people in a similar, or better, health than a vaccine against COVID-19, and, for refusing to be vaccinated. "Once I challenged one of their policies, I immediately became a 'threat to the health and safety of the community.' No amount of empirical evidence about natural immunity or vaccine safety and efficacy mattered at all. The university's leadership was not interested in scientific debate or ethical deliberation. In an effort to pressure me to resign, they wanted to restrict my ability to earn an income not only at the university but outside the university as well. It was dizzying and at times surreal." In social media, Kheriaty further observed that, "Those consumed by fear cannot tolerate those who are not afraid." He later went on to describe the near-totalitarian state of medicine in California when it comes to COVID.

Dr. Clive Dix, former chairman of UK's Vaccines Taskforce: "The Omicron variant is a relatively mild virus. And to just keep vaccinating people and thinking of doing it again to protect the population is, in my view, now a waste of time."

Dr. Roger Hodkinson: "The bottom line is simply this: There is utterly unfounded public hysteria driven by the media and politicians. It's outrageous. This is the greatest hoax ever

perpetrated on an unsuspecting public. This is not Ebola. It's not SARS. It's politics playing medicine and that's a very dangerous game. Masks are utterly useless. There is no evidence base for their effectiveness whatsoever. Paper masks and fabric masks are simply virtue-signaling."

Dr. Mary Bowden had her privileges revoked by Houston Methodist hospital and suspended for thoughtcrime, that is, "spreading dangerous misinformation," namely, her support of ivermectin and opposition to vaccine mandates. She is suing the hospital.

French doctors burned their medical diplomas in protest over being suspended without pay for refusing to take the vaccine. There was even less media coverage than usual.

Dr. Martin Kulldorff: "But Sweden decided to keep daycare and schools open for all children ages 1 to 15. And there are 1.8 million such children who got through the first wave without vaccines, of course, without masks, without any sort of distancing in schools. If a child was sick, they were told to stay home. But that was basically it. And you know how many of those 1.8 million children died from COVID? Zero. Only a few hospitalizations. So, this is not a risky disease for children."

Baylor University Medical Center fired Dr. Peter McCullough. Texas A&M College of Medicine and Texas Christian University and the University of North Texas Health Science Center School of Medicine cut ties with him for his comments about the experimental vaccines, and, for using hydroxychloroquine and ivermectin in the early treatment of COVID. "I've been stripped of every title that I've ever had in that institution. I've received a threat letter from the American College of Physicians, [and] a threat letter from the American Board." He opposes vaccinating healthy children and has bewailed the fact that pre-hospitalization cures have been bypassed in favor of vaccines. Recently, McCullough has

pointed out that since the vaccines have demonstrably failed to spread the Wuhan virus, the mandates should end. Dr. Anuj Malik at Ascension St. John referred to Dr. McCullough's statements as "politically motivated, ideological speech by a modern-day quack."

Dr. Martin Makary wrote, "But given the case-report level rarity of a healthy child dying of COVID-19, I would not recommend a two-dose vaccine regimen for a healthy child ages 0 to 12 years until we have more data."

Dr. Motherico Fedes: "There is a world war going on, only no one realizes it is one because it is being carried out under the guise of righteousness and science. Never before has the term science been misused and tarnished on such a global scale."

Dr. Adam Aneevit: "So if you still need a booster after been fully vaccinated, and testing after been fully vaccinated, and hospitalization after being fully vaccinated, and masks, social distancing and lockdowns all after been fully vaccinated? Then it's time that you've been FULLY conned."

Dr. Blaise Edwards: "Those physicians who are authoritatively forcing the shot on all patients have blood on their hands. They should know better, especially regarding pregnant women and children. Regarding the pediatric population, there is basically zero chance an otherwise healthy child could die of COVID, so why are we exposing the entire pediatric population to a potentially life-threatening jab? It is outrageous for a physician to recommend these jabs to otherwise healthy children."

In Austria, Dr. Andreas Sönnichsen penned a letter signed by 200 doctors against the vaccine. "The blanket declaration by the Austrian medical association, by politicians and the media that the vaccine is 'safe,' has proven to be unscientific propaganda." He further stated that "98% of people who

contract severe forms of COVID-19 show at least one relevant pre-existing condition.” In retaliation for stating scientific facts, he was fired from the Department of General and Family Medicine at the Center for Public Health in Vienna. Andreas Huss, chairman of the ÖKG, Austria’s public health insurance fund threatened him with prison. Dr. Thomas Szekeres, president of the Austrian Medical Association, also threatened the signatories. Sönnichsen responded, assuring him that they “will not be intimidated by you or any other health official with a similar mindset.”

In Austria, Dr. Johann Misliwetz: “Physicians who contradict the mainstream opinion face fines of up to 36,340 euros, the destructive ban on practicing medicine, and on top of that their deletion from the doctors’ registry.”

Dr. Cameron Kyle-Slidell, in April 2020, went to social media to express his concerns that intubation was doing more harm to patients and made no sense in treating the virus’ symptoms. Here it is 2022, and intubation is still being employed in hospitals with fatal results.

Dr. Eric Saunders was fired from Valley Hospital in Ridgewood, New Jersey, for refusing to take the dangerous vaccine. Nicole Fanelli a mammography technologist was fired from Crozer Health in Pennsylvania for the same reason. The same with Nicole Thibodeau, a registered nurse case manager for Beth Israel Lahey Health. Also, Trudiann Edmondson, a remote patient care coordinator, from Northwell Health. Loni Thalheimer, a nurse, was also fired for refusal to submit. She stated, “About two, three months into the community having full access to vaccines, I started seeing A LOT of people coming in for MRIs for idiopathic seizures, migraines, dyskinesias, paresthesias, and even comas. I stated we are seeing a rise in weird, abnormal things happening in healthy people, and everyone refused to answer me. If we are in a clinical trial, why are we not required to be collecting data? I was baffled.”

Maryland Rep. Dr. Rep. Andy Harris is having his license investigated because he prescribed ivermectin to patients instead of ramming a tube down their lungs (India ended the COVID pandemic as early as the start of summer 2021 through the use of ivermectin).

In Quebec, over 100 doctors, nurses and other health care individuals held a protest against the insane "vaccine passport." Elsewhere in Canada, Dr. Daniel Nagase used his medical judgment to prescribe ivermectin to three patients who were at death's door. They got better. Then, the staff took away the lifesaving medication and Nagase was fired. "There is something malicious going on. I hope you can all see the bigger picture. This is more than me having all my assignments to take care of small communities cancelled for the rest of the year. This is more than the medical director, Dr. Francois Belanger, banning me from hospital practice throughout all of Alberta."

An undercover operation recorded persons working in a pharmaceutical company saying that children do not need vaccines and should not get it. As usual, this was ignored by the propaganda outlets. John Soriano was an executive at a pharmaceutical company who resigned in protest for coercing its employees to take the vaccine (he did so willingly), thereby forfeiting millions of dollars, "because I cannot support such an immoral, anti-science show of force." His narrative is well worth a read.

An unidentified doctor made a video of experiments demonstrating that face masks are useless in preventing the transmission of a virus.

Dr. Ted Noel writes, "The CDC and FDA are totally invested in expensive vaccines that cause myocarditis, strokes, miscarriages, and other major complications" whereas "Ivermectin, [is] an incredibly inexpensive drug with very little toxicity." One cannot help but wonder why, indeed, is

there a dogmatic refusal to consider ivermectin and/or hydroxychloroquine if they have been found to save people's lives and have no side effects, nothing near like the untested gene therapy "vaccines." And why is the media desperately being silent on this?

Novant Health, a North Carolina-based hospital system fired 175 health care workers for their refusal to take the dangerous vaccine. Indiana University Health fired 125 staff members for the same reason. So many health care workers refuse to engage in Russian roulette with their health that CDC Director Dr. Rochelle Walensky said the National Guard may have to fill in.

Dr. John P.A. Ioannidis looked at 14 countries' records for fatality due to COVID. People up to the age of 19, have 0.0027% chance to die from COVID-19, people between the age of 20-29 have 0.014% change to die, those between 60-69 with a risk of 0.59% to die. He has warned of this "once-in-a-century evidence fiasco." By going against the official dogma, Dr. David Gorski bemoaned the fact that Ioannidis is no longer his hero.

Dr. Mollie James, an ICU Doctor in New York City: "Never in my lifetime have I seen medicine so politicized, where individual treatments are banned because of who is promoting them. It's a scary time to be a healthcare professional, and the public needs to know how bad things are getting. Your healthcare is being guided by political demands, not by what will lead to the best individual healthcare outcomes."

What is just as bad is that science is being sabotaged by suppressing data: "We are being pressured to vaccinate, and we see the large number of vaccine complications in our ICU's and ER's that are going unreported. Doctors are afraid to report all of these vaccine complications even though we are clearly seeing them. I would estimate 30% of the ICU patients in NYC are from vaccine complications but nobody wants to talk about

that. They get coded as something else or they will ignore the fact an otherwise healthy person had a heart attack or stroke within 48 hours of receiving the vaccine.”

There is a very good reason why it takes many years to produce a new vaccine or medicine. Can you say “thalidomide”?

Dr. Daniel Stock spoke at Mt. Vernon School Board Meeting and explained the nature of airborne pathogens such as covid; he recommended the use of hydroxychloroquine and ivermectin, and he damned the CDC and NIH as being anti-scientific. This energetic delivery was promptly censored by YouTube. Before it was taken down, the video went viral and consequently, a number of internet media outlets pounced and classified his statements as “disinformation.”

There have been a lot of asinine and immoral decisions made regarding the disease. Racism has been instituted in a number of cities when it comes to treatment of covid. Dr. Joel Zinberg, at the Icahn School of Medicine at Mount Sinai blasted New York City’s leftist bureaucrats’ decision to give preference to who are “Black, Indigenous, and People of Color” and relegate whites to the end of the line. “These directives are immoral, illegal and bear no relation to the science.”

Dr. Deborah Birx: “There is nothing from the CDC that I can trust.” The CDC has been inflating both mortality rates and number of cases by 25% or more.

Dr. Thomas T. Siler wrote what had been learned 18 months into the pandemic that journalists insisted would kill 2 to 11 million people in the United States alone: 1) Globally, the survival rate for COVID-19 is 99.8%. 2) Herd immunity for the alpha strain is here. 3) The average age of death from COVID is 78. 4) Early outpatient treatment should be adopted immediately for COVID-19. Hydroxychloroquine works. Ivermectin works. It has been estimated 85% of COVID-19 deaths could have been prevented were these medicines used early. 5) Children

are safe from COVID-19 and don't spread the virus either. 6) Sweden did not have a lockdown or mask mandate and did better with cases and deaths than many countries. 7) Persons who have had COVID-19 infection have a robust and long-lasting immunity. 8) There is very little, if any, spread of COVID-19 from asymptomatic persons. 9) The death rate nationally for COVID-19 has been going down since January 2021. "Breathless 'news' reporters talk about cases, hospital occupation, and contagiousness but never mention the death decline."

Dr. Jessica Rose and Peter McCullough analyzed VAERS data. She found that the yearly number of reported adverse effects had skyrocketed. There were over 11,000 heart attacks, 13,000 cases of Bell's palsy, over 25,000 cases of myocarditis or pericarditis and more than 21,000 deaths. They were vaccine related. The analysis was published in a scientific journal. And then it was promptly censored. Without explanation. The paper can be viewed in samizdat-internet.

When Dr. Charles Hoffe warned that the mRNA "vaccine" is very dangerous, which causes blood clots and myocarditis and may kill people, based on what he was witnessing in a hospital and private practice, he was issued a gag order against speaking out on behalf of his patients. By contrast, no one in the community died or became permanently disabled due to the COVID-19 virus. Hoffe did not, and was punished by being removed from the hospital. He is unrepentant, saying the loss of income is "the price of advocating for the safety of my patients."

The Association of American Physicians and Surgeons (AAPS) issued a statement in April 2021 that vaccines cause blood clots. Here it is February 2022 and the authorities are offering the vaccines and the media hivemind (New York Times, Washington Post, NPR, Boston Globe, The Guardian, San Antonio Express-News, ABC, NBC, CNN, MSNBC, CBC, CBS, BBC, and their subsidiaries, etc.) on a daily basis is urging everyone, including children, to get the experimental concoction and

demonizing anyone who refuses or objects. The media is truly the enemy of the people. On so many levels.

Dr. Bryam Bridle: “We thought the spike protein was a great target antigen, we never knew the spike protein itself was a toxin and was a pathogenic protein. So by vaccinating people we are inadvertently inoculating them with a toxin. Once in circulation, the spike protein can attach to specific ACE2 receptors that are on blood platelets and the cells that line blood vessels. When that happens it can do one of two things: it can either cause platelets to clump, and that can lead to clotting. That’s exactly why we’ve been seeing clotting disorders associated with vaccines. It can also lead to bleeding.”

Washington Medical Commission revoked Physician Assistant Scott Miller’s medical license. For one thing, he was advocating the use of ivermectin and the discarding of face masks.

Dr. John Witcher, at the Baptist Memorial Hospital in Yazoo City, was removed from treating patients for making a medical decision in taking them off Remdesivir, and allowing them to use ivermectin.

UK’s Dr. Andrew Bostom took a look at the statistics and concluded that the chances of a child under the age of 15 being struck by lightning are four times than of dying from the covid virus.

18 months into the pandemic panic, Dr. Vinay Prasad stated that children are much less vulnerable to the illness and that the forced wearing of face masks may cause harm to them, noting in passing, “the issue has been transformed into a right-left political battle.” The fanatical Covidians’ pretense of caring for children’s health rings hollow: Children are practically immune to covid – in spite of what the propaganda outlets scream out – and they know it. On the

other hand, kids have suffered because of masks and being away from schools. Proof of this is that our overlords discard their face masks once the cameras are out of sight.

Lastly, Israel's Dr. Yoram Lass: "It is the first epidemic in history which is accompanied by another epidemic – the virus of the social networks. These new media have brainwashed entire populations." And: "Mortality due to coronavirus is a fake number. Most people are not dying from coronavirus. Those recording deaths simply change the label. If patients died from leukemia, from metastatic cancer, from cardiovascular disease or from dementia, they put coronavirus."

Unfortunately, due to lack of space, I have left out other physicians, the numerous nurses, as well as regular people who may not have a medical degree but can think for themselves with impeccable logic (e.g., "If your shot works, why should I take one? If your shot doesn't work, why should I take one?" "Of course all scientists agree when you censor the ones who don't" "Imagine a vaccine so safe you have to be threatened to take it for a disease so deadly you have to be tested to know you have it!!").

When this farce finally ends, heads will roll.

First published in [*Issues and Insights*](#) in February 2022.
