

Why Not Arrest President Biden Before He Can Pardon Himself?

By Phyllis Chesler

WHY NOT ARREST PRESIDENT BIDEN! According to a breaking story in the New York Post, the “mentally fatigued” President has been asleep at the wheel for the last four years. [Read it here](#).

Biden did not take a phone call from a powerful committee chairman before pulling out of Afghanistan.

Biden actually “skipped out on a phone call from the chair of the powerful House Arms Services Committee right before the US’s disastrous withdrawal from Afghanistan.

The ICC, (International Criminal Court), should issue arrest

warrants for Biden and for all those Democratic Party leaders, (who hid his cognitive disabilities), for their knowing and purposeful failure in the matter of Afghanistan. We, the American people should sue him and the Democrats for the lost American #Marine and Afghan ally and civilian lives; the consequent #Taliban torture of Afghan civilians; the Taliban's subsequent persecution of Afghan women; and for the loss of 7 billion dollars in American military equipment. These are both moral, criminal, and civil crimes.

I was privileged to have co-led a mission which rescued 398 Afghan women in 2021 and I remember—oh how I remember—how the Taliban fiends were beating, whipping, and shooting all of them who were rushing to the airport.

The story's much bigger than only Afghanistan. In my opinion, once America withdrew from Afghanistan in August of 2021, Putin knew that Biden/Obama's America would never stop him And thus, Putin invaded Ukraine on February, 2022. The issue of Ukraine is also on Biden. Oh, I could go on...Iran, the entire Middle East, Israel—all of Obama/Biden's foreign policy. Only now that President Trump has been re-elected do we begin to learn about the cover-up and the many and enormous policy failures on Biden's watch.

Biden will probably pardon himself before We, the People can even talk to a lawyer.
