

Wilders: For the West to Survive, Stop Islamic Immigration

Source: Getty Images

Hon. Geert Wilders, leader of the Dutch Freedom Party (PVV) in the Hague Parliament is rightfully concerned about the future of the West in this *Breitbart Report* article, "[Geert Wilders: Stopping Islamic Immigration Is a Matter of Survival.](#)"

The massive flood of Muslim flight to Europe from the conflicts in the hotspots of the Ummah in Africa, the Middle and South Asia threatens both the demography and Judeo Christian values that are the foundation of laws of Europe and the West.

Last weekend on *The Lisa Benson Show* we heard evidence of Wilders' arguments in the stark figures of how this historic Dar al Hijrah immigration wave has literally swamped Sweden resulting in thousands of instances of lawlessness, sexual assault, and murder by hordes of Muslim young men and unaccompanied minors. The Hon. [Kent Ekeröth](#), deputy of the Sweden Democrat party in the Riksdag, the national parliament, revealed that 35,000 unaccompanied youths now constitute 50 percent of students in the country's high schools. The upwards of 200,000 migrants and asylees that Sweden received in 2015 and early 2016 as US international affairs commentator [Barry Nussbaum](#) indicated is equivalent to receiving the equivalent here of the population of the State of Indiana.

The Swedish tolerance for this wave of Muslim immigration has resulted in the Interior Minister issuing an expulsion order for 80,000 of these unwanted arrivals. Neighboring Finland has

issued an expulsion order for 20,000 migrants. Germany, where Chancellor Angela Merkel once welcomed one million Muslim migrants has reached near rebellion with public opinion polls demanding that she resign. Community leaders in Germany, Norway and other locations in the broken borderless Schengen system have advised young women not to dress provocatively effectively adhering to Sharia demands of domestic Imams.

But Europe is not alone in being threatened. Our neighbor to the north, Canada, under the new Liberal government of Justin Trudeau is admitting 25,000 Syrian refugees with many being put up in Canadian Forces bases around the country. Given Canada's 35 million in population that complement of Refugees would be the equivalent in the US of over 225,000, according to recent testimony by Canadian counterterrorism expert, David B. Harris. Then there are the 10,000 Syrian refugees to be admitted here in the US over the next two years distributed in more than 190 communities in the US. The difficulty is, as [Dr. Sebastian Gorka](#), son of Hungarian Refugees from the 1956 Revolt against Russian tyranny, said on a recent Lisa Benson Show program, how can we possibly vett these refugees, if there isn't a data base to confirm the documents?

Whether Europe can stop the flight of Muslim migrants is the challenge that Wilders argues if his native Holland, Europe and the West are to survive. Right now that prospect is teetering on the brink unless concerted action is taken to stop Muslim flight at its source in the warring lands of extremism in the Ummah. Yet, the West rejects any concerted multilateral strategy to reverse the great wave of Muslim migration. If it doesn't adopt such a strategy then the future could be a dystopian realm of unimaginable oppression and chaos for our children and grandchildren.

Geert Wilders, US Capitol April 2015

Breitbart Report: [**Geert Wilders: Stopping Islamic Immigration Is a Matter of Survival.**](#)

In April last year, the renowned nonpartisan Pew Research Center released a report on the future growth of world religions. The content was shocking. The report states that, if current trends continue, Islam will almost equal Christianity by 2050. While the world's population is expected to rise by 35 per cent until the middle of this century, Islam will grow with a staggering 73 per cent.

The consequences of future Islamic growth are frightening. Islam is not a religion like Christianity, but rather a totalitarian political ideology. Its goal is primarily political. Islam wants to make the whole world submit. It aims to establish a worldwide Islamic state and bring everyone, including "infidels," such as Christians, Jews, atheists, and others, under Sharia law. This is the barbaric Islamic law which deprives non-Muslims of all rights, treats women as inferior beings, condemns apostates and critics of Islam to death, and condones terror. More Islam equals more violence, more intolerance, more terrorism.

With the growth of Islam, the world will become a less safe place. And so will America. According to Pew, the United States will see its number of Christians decline from more than three-quarters of the population today to two-thirds in 2050, while Islam will more than double in size and replace Judaism as America's largest non-Christian faith. The consequences of the Islamic presence in America have already been visible in several murderous attacks, such last December's San Bernardino shooting, but also the 2013 Boston Marathon bombing, the 2009 Fort Hood shooting, the 9/11 terror

attacks in 2001, and several other acts of terrorism. If Islam doubles in size, the threat of terrorism will only grow.

In the past, the totalitarian ideologies of Nazism and Communism have both been defeated by the common efforts of America and Europe. Without America, Europe would have been lost. But without Europe, America would have been isolated. If Europe had fallen to either Nazism or Communism, there is no doubt that America would have become the next victim. The Transatlantic alliance between Americans and Europeans has been the key to the survival of our common Western civilization. This alliance is in danger today, because the more Islamic Europe becomes, the less reliable it will be as an ally of America.

Though the predicted future rise of Islam in the US is worrying, the situation in Europe is far worse. The Pew figures show that Islam has already gained a significant foothold on the European continent and is growing rapidly. Europe's Islamic population, boosted by higher birth rates and immigration, will nearly double, from 43 million people in 2010 to 71 million people in 2050. In the Netherlands, Muhammad is currently already the second most popular name among newborn boys nationwide and even the most popular name in our three largest cities, Amsterdam, Rotterdam and The Hague. This is also the case in the Belgian capital Brussels, the Norwegian capital Oslo, and the British capital London. As a matter of fact even in the whole of Great-Britain, Muhammad has become the most popular name for newborn boys.

The Islamization of Europe will profoundly influence European politics. Winning the Islamic vote will become the goal of ever more European politicians. As a result, Europe's policies will become even less friendly towards Israel and the United States than they already are. The Atlantic alliance is in danger.

The Islamic vote has already
